

Appendix 6.1

Services and Supports in the Northern Territory

This mapping has been compiled from multiple documents provided to the Inquiry and from other public documents. The designation of programs and services as universal, secondary and/or tertiary has been conducted for the purposes of this mapping and is certainly not definitive. This mapping is not exhaustive - it is inevitable that some activities will not have been included, and that in some places indicated activities are not taking place or have ceased. What is intended is that the mapping exercise is an indicator of the large amount of activity in the area of child safety and wellbeing that is taking place across the Northern Territory. The Inquiry is also aware that there are more comprehensive mapping exercises taking place – for example, in the remote service delivery sites (Growth Towns) in which baseline mapping has been or is being conducted. This information will be essential in identifying service provision, service gaps and community needs regarding the promotion of child safety and wellbeing. This information is also driving the Local Implementation Plans for each town, but the Inquiry's understanding is that to date the Local Implementation Plans do not include a strong focus on child safety or child wellbeing. This is a key area of focus for the Inquiry.

Community	Program	Children's age group for the service	Agency	Universal/ Secondary/ Tertiary
Adelaide River	Remote Area Health Services including: Healthy Under 5s Check, School Screening, STI Screening, Antenatal Programs, Anti-suicide programs, Supporting grandparents to support young children, young adult health checks	All	DHF	Universal
